

PennCourseConnect

Overview:

Currently, the group chat system for courses at Penn is highly inefficient. It consists of a bunch of GroupMe groups, and to join, one must either find the spreadsheet or obtain the GroupMe invitation link from someone else. In order to improve on this current junk system, I will create PennCourseConnect. The goal of PennCourseConnect is to centralize communication among classmates at Penn.

Frameworks/Packages:

Firebase Firestore (database)

KingFisher (Images)

Firebase Authentication (user login)

Firebase Cloud Messaging (for messages)
